The scandal of education is that every time you teach something, you deprive a student of the pleasure and benefit of discovery.

- Seymour Papert
Creativity, imagination, and the nurturing of dreams are what education is meant to be.
A flipped classroom is a teaching method in which students view lecture videos at home and do homework in class. The teacher provides videos for homework, while traditional homework is done in class. The teacher is free to help students with what they don't understand.

A flipped classroom is a model of teaching in which a student's homework is the traditional lecture viewed outside of class on a vodcast. Then class time is spent on inquiry-based learning which would include what would traditionally be viewed as a student's homework assignment. A flipped classroom is where a class where all students can get a personalized education. A class where all students are engaged in active learning, where students ask questions if they do not understand something. The students watch the videos they take notes when they come.

A flipped classroom is where the teacher creates (or uses others) videos which students watch at home. A flipped classroom is a teaching method in which the students are in charge of learning the lesson at home, and bring any questions that they have to class the next day. After discussing them, they do their assigned homework in class.

A flipped classroom is where students take the initiative and learn the lesson. This process is similar to college, and will help prepare the students for future classes.

Flip the Experience
Flipping the Experience (Part 1)

• Let students learn by doing
  – Enable learning to come alive

How and What

Apply to Real Problems

Collaborative, Sustained Projects
Tell me and I forget,
show me and I remember,
involve me and I understand
Flipping the Experience (Part 2)

- Let students own their learning
  - Deep, authentic, transformative things happen

Control Content ➔ Student Inquiry and Agency
Flipping the Experience (Part 3)

• Assessment
  – Can’t be about a single grade
  – Must be about a documented process
    • Individually-created
