What if you CAN'T DRAW and want to design?

DRAWING from reality /observation is a key boost for anyone who can't **draw**, and wants to **design** fashion. There is no substitute for getting down and just ...

I am a design student who is incapable of drawing. Need ...

Also don't be **afraid** of **drawing** on a nice paper. It's just paper and it will be useless if you don't **draw** on it. **Draw** everyday and everything.

Investigation of instructional strategies intended to relax students' sketch inhibition.

The goal was to create a **relaxed course culture** in a hybrid learning environment that supports both formal skill building, and informal sketching practice.

Hybrid Approach to teaching 3D sketching skills:

1. Skill Building: Studio Based Activities

- Presentations
- Skill-modeling (document camera)
- Formal studio-based assignments to develop basic skills
- Opportunity to create guided, time consuming, flawless, safe, results

2. Skill Application: Travel Sketches

- Informal learning environment
- Informal practice
- Relevant subjects (buildings, furniture, people, plants)
- Low-stake course component
- Representing messy process of learning a 10000-hour skill

Feedback and Assessment Loop

- Variety of assessments
- Range of **formative assessments**
 - **Teachers**
 - helps faculty recognize where students are struggling and address problems immediately
 - **Students**
 - helps students identify their strengths and weaknesses and target areas that need work

Feedback and Assessment Loop

Students give feedback to students

- Self assessment
 - Survey at the start of semester
 - Weekly exit tickets
- Peer evaluations in groups
 - Verbal weekly review of homework sketches
- Peer evaluations in pairs
 - Written and verbal in response to prompts

Students give feedback to instructor

- Weekly exit tickets
 - What remains to be explained feedback
- 6-week student feedback
 - What should I stop doing?
 - What should I start doing/suggestions?
 - What should I keep doing?
- Mid semester chat with department chair
- 12-week student feedback
 - What should I stop doing?
 - What should I start doing/suggestions?
 - What should I keep doing?
- 16-week student course evaluations

Feedback and Assessment Loop

Instructor gives feedback to students

- Individual desk crits
 - Individual crits
 - In response to submitted sketches
 - Repeated skill modeling
 - Grading rubrics
 - One-on-one sit-down review
- Verbal during studio assignments
 - Verbal during field trips
 - Written on post-it notes, attached to sketches
 - Document camera in response to quality of student work
 - Conveying timely feedback
 - Verbal during class time at instructors' desk

Research Questions

How does the implementation of a constant and rich feedback loop effect students' skill development?

Research Questions

How do regular sketching field trips affect students' comfort levels with their slowly developing sketching skills?

Ethnographic Informer (undergraduate research assistant)

- Attended all class sessions (not for credit)
- Engaged in all class activities (with the exception of homework)
- **Weekly research team meetings:**
 - Reported about **her own experiences during class time** (from the perspective of a student who had attended the course prior to the curriculum changes)
 - Reported about the **enrolled students and their experiences** and perceptions
 - Asked questions about data collection proceedings (jottings)
 - Helped to come up with **new strategies and new assignments** to address student needs as we understood them **in response to the constant feedback loop**
 - Made suggestions for the **purposeful selection of participants**
 - **Received mentoring** on how to conduct effective interviews
- Recruited **8** participants for **semi-structured interviews**
- **Conducted** and recorded **8 interviews** with students
- Distributed incentives (\$15 gift cards)
- Invented the pseudonyms for the participating students

Instructor

- Instructed all class sessions
- Provided all feedback to students
- Developed all instruments for the feedback and assessment loop
- **Weekly research team meetings**
 - Shared the feedback she had received
 - Shared the student work she had received
 - Asked for observers' input on new exercises and teaching / classroom management strategies in response to student feedback

Participant Observer (PI)

- Attended all but 2 class sessions
- Participated in numerous sketching exercises during class time
- Photographed class activities
- **Weekly research team meetings**
 - Peer debriefing
 - Adjustments to the research design (interview guide e.g.)
 - Suggestions for adjustments to instructional techniques
 - Mentoring

Data Sources

- Primary
 - Baseline data (student self assessment from day one)
 - Interview transcripts
 - Ethnographic informer
 - Reports
 - Jottings
 - Observations by PI
- Secondary
 - Constant written feedback from students
 - Student work

Data Analysis in Progress

- Qualitative data analysis software (Dedoose)
- Interview transcripts
- **1. open coding phase completed**
- Theme development with focus on feedback loop

Students' Feedback to Students

1.) Where vanishing pt goes depending on where you're sitting

2.) not very good at proportions

1.) I learned how to sketch using one point perspective which will help me draw more realistically.

2.) I wish to learn more about getting proportions right, especially when defining depth of objects.

Week 4

1. the most important thing I learned was the X method to get more accurate proportions for when it comes to depth in one-point perspective

2. nothing is left unclear after this week's material 😊

Student Self-Assessment 5 points

Year in School + Graduation Date: Senior, May 2016

Completed Interior Design Courses: FCS242, FCS204

Are you enrolled in Studio 1? No

What other Interior Design courses are you taking this semester? FCS206, FCS208

Prior to this semester, have you ever taken a course (in high school or college) that intended to teach you freshman sketching skills? FCS106 last semester and FCS242

Have you ever taken a course (in high school or college) that intended to teach you how to use drawing software? If yes, which one? Autodesk

Familiarity with types of Drawing (1 not familiar - 5 proficient)

Plans <u>4</u> If familiar, how did you learn? <u>FCS204</u>	Sections and Elevations <u>4</u> If familiar, how did you learn? <u>FCS204</u>
Isometric <u>1</u> If familiar, how did you learn?	Isometric <u>1</u> If familiar, how did you learn?
One-point Perspective <u>1</u> If familiar, how did you learn?	Two-point Perspective <u>1</u> If familiar, how did you learn?

What makes you excited about taking this course? I love sketching and it makes me feel like I'm working on it.

What makes you nervous about taking this course? I don't think I am drawing accurately enough.

What are you hoping to learn from taking this course? Maybe how to do more accurate sketches quickly.

What is your favorite thing about Interior Design? I love the sketching and drawing of layouts and drawing plans.

Student Self-Assessment FCS 246

FCS 246

Group Field Trip and Peer Review (5 Points) Filed trip sketches (6 points)

Sketch Architectural Buildings with shade, shadow, texture, and entourages.

- Choose the location on campus with a group discussion
- Sketch minimum 2 Sketches in one point perspective with shade, shadow, texture, and entourages on index card
- Take the picture of your choice of building
- Share your ideas and your sketches with a class:
 - why did you choose the building/location?
 - what did you like about it? (Texture, surroundings, great light/shade/shadow)

Peer review on one of your group member sketches and tell us best part in a sketch and what can be improve in the sketch

Student: Liz S Reviewer: Kelly H

Is the overall sketch clearly defined?

Very clear	<input checked="" type="checkbox"/>	What was done well: <u>Very neat lines, good line weights</u>
Mostly clear	<input type="checkbox"/>	
Somewhat clear	<input type="checkbox"/>	Suggestions for improvement:
Largely unclear	<input type="checkbox"/>	

Does the sketch appear to be in scale? (Overall proportions are right of the building, such as doors and windows proportionate to height of building)

Very clear	<input checked="" type="checkbox"/>	What was done well: <u>Looks to be in scale, windows and doors look like good sizes</u>
Mostly clear	<input type="checkbox"/>	
Somewhat clear	<input type="checkbox"/>	Suggestions for improvement:
Largely unclear	<input type="checkbox"/>	<u>I think we did something wrong with the</u>

Is relevant perspective sketching Conventions demonstrated clearly? (Such as horizon line used, all lines are receding in vanishing point)

Very clear	<input type="checkbox"/>	What was done well:
Mostly clear	<input checked="" type="checkbox"/>	Suggestions for improvement:
Somewhat clear	<input type="checkbox"/>	<u>I think we did something wrong with the</u>
Largely unclear	<input type="checkbox"/>	

Is relevant textures, shades, surroundings demonstrated clearly? (Such trees, plants, human figure, textures (stone bricks, etc.))

Very clear	<input type="checkbox"/>	What was done well:
Mostly clear	<input checked="" type="checkbox"/>	<u>good shading</u>
Somewhat clear	<input type="checkbox"/>	Suggestions for improvement:
Largely unclear	<input type="checkbox"/>	<u>brick texture, trees</u>

Self Assessment

Peer Evaluations in Groups

Peer Evaluations in Pairs

Weekly Exit Ticket

Pick up one index card, write the course name on top and answer following question, don't need to write your names.

1. What was the most important thing you learned during this week?
2. What important part remain unclear or needed to teach better during this week?

246

1) most important: beginning 2 pt perspective

2) unclear: cylinders in 2 pt perspective

WEEK 9

LEARNING HOW TO APPLY PERSPECTIVE SKILLS TO 2-POINT PERSPECTIVE

2. DRAWING SHADOWS IN 2-POINT

1. Vanishing point is where you sit/stand, horizon is eye level.

2. Drawing corners of a room with HL and VP are a bit difficult

Weekly Exit Tickets

What do you think I should keep doing it in the class/ that works best for the class?

Keep showing demos and examples and keep giving exercises

Keep Doing: Field Trips, I like perspective drawings

A THE FIELD TRIPS & INDIVIDUAL ACTIVITIES ARE VERY FUN AND HELPFUL TO APPLY CONCEPTS LEARNED IN THE DEMOS

1) Keep showing demos but maybe not as many... let us figure out our mistakes

I think you should keep doing demos and field trips

I think you should keep doing demos of how to apply lecture material

peer reviews to learn from each other's work

Field trips to apply our skill to real-life

I think we do really well when we sketch in small groups. Not as much pressure

Keep doing?

- I like the field trips a lot

think that in class demonstrations work best

The field trips. Its good to explore during class time rather than just sitting in lecture. It helps with my creativity.

D FIELDTRIPS
JOURNAL SKETCHES
LECTURES

- I LIKE IT ALL

6 Weeks Students Feedback

What do you think I should keep doing it in the class/ that works best for the class?

1) FIELD TRIPS + JOURNAL SKETCHES + DESIGN CHALLENGES

I like the field trips and real life drawings

in class exercises

KEEP DOING SMALL GROUP FIELD TRIPS AND THE DESIGN PROJECTS

Design Projects

keep giving field trips, even if inside maybe 1 class maybe 3 trips same building but new content

Keep doing...

- giving us chances to design our own concepts
- doing demonstrations of new material/techniques
- giving us in-class work time to practice our sketches

I think that exercises help a lot

D I like the in class assignments + sketches because you can walk around and see our progress as well as what we are doing right vs wrong.

Write down what you want me to stop doing it in the class?

2) NOTHING IS GOING PERFECT

2. Nothing in particular

there's nothing that you need to stop doing. I think this classes work load and the type of material is good

I CANT THINK OF ANYTHING THAT ISNT WORKING FOR ME

Maybe less journal sketches

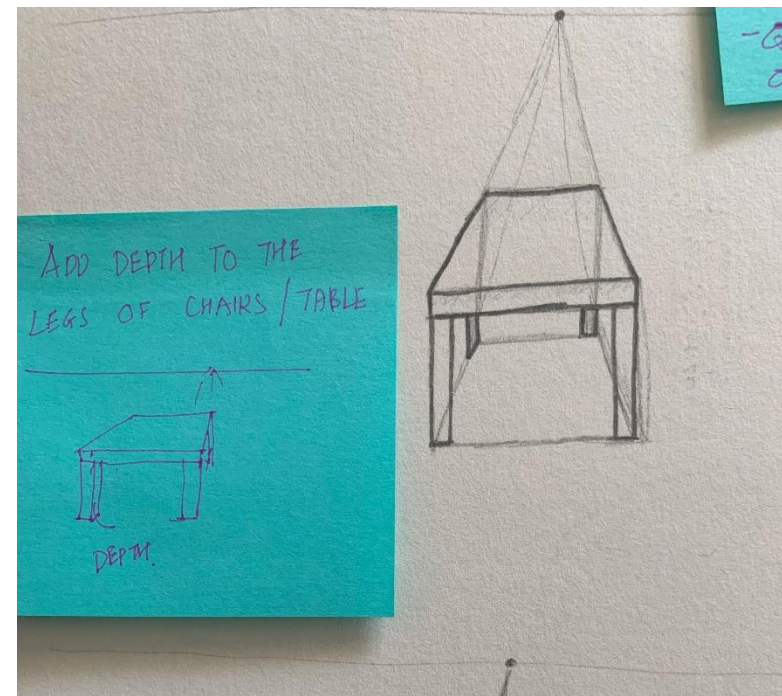

stop doing...

- repeating concepts we've already done/practiced a few times

stop asking if need demos, give them

12 Weeks Students Feedback

Instructor's Feedback to Students

Wide Range of Instructor Feedback

Instructional Techniques

String method to show how edges that are parallel merge in a vanishing point on the horizon in perspectives

Taping the horizon and vanishing points onto the studio walls

Skill Building: Studio Based

Students valued the **step-by-step instructions** provided in from of skill modeling using the document camera where complex sketching tasks were presented systematically.

- **The demos are definitely helpful**, and it is nice to follow along. (Rachel)
- It is a very visual thing, so seeing her do the **demonstrations on the screen is helpful**. (Jessica)
- **She is walking us through step by step, and it is a lot easier than I thought it would be**. (Jessica)
- **I liked having her demo something first** and then I was able to produce that better. (Dorothy)
- **When she demos. It helps just to visualize it**. (Madison)
- I like how when we do the exercises, we're given the step-by-step instructions. (Samantha)
- **(T)hat helped me because it kind of taught you how to start** and what it should look like. (Lydia)

Skill Building: Studio Based

Students valued the private **one-on-one verbal instructor-student feedback** and asked for more.

- **Maybe one more.** (...) One more could be helpful. Just maybe more towards the beginning, more towards the end. (Samantha)
- But then it was a very ... Just open conversation, it wasn't her being like, oh, you can do better at this. And it was just very much, do you like how this is going? How can I help you? So yeah, **I enjoyed doing that** because-. (Samantha)
- **I always found them helpful.** (Jessica)
- I kind of came into it with an open mind that I needed to be critiqued and I needed to get over myself, let people tell me what to do, so. (Dorothy)
- I feel like **if we had more critiques, our sketches would improve even more.** (Lydia)
- I feel like **she should spend more time giving more feedback.** (Lydia)
- **(T)hat kind of dedicated one-on-one where we're going through multiple things, I think was really helpful.** (Maxwell)
- (I) much prefer one-to one. (Maxwell)
- **I would've liked more of that one-on-one,** because I feel like sketching is a very personal thing. (Joel)
- **I do wish we did more of those.** (Joel)

Skill Application: Travel Sketches

Most students enjoyed the **field trips / travel sketches** as a mode of instruction outside the classroom. For some this form of skill application was intimidating.

- (W)we spent so much time in the studio classes here, where I feel like it was kind of a nice **change of scenery and change of pace** to just have, let's say the second half of class blocked out to just go find somewhere on campus of our choosing and just sketch. (Maxwell)
- I think those were **my favorite**. (Joel)
- **I like being outside and doing different things** (...) if you're outside doing something in real time, I feel like **it's almost more challenging, so it makes it more helpful in the end**. (Samantha)
- (W)hen we're on the field trips,
- **(I)t's more of just take everything you learned and good luck**. (Samantha)
- I think those really helped because it wasn't just sketching based off a picture. It was sketching based off what we're seeing actively. (Joel)
- I really liked the field trips, honestly, just for the aspect that it **helped time go by faster**. (Samantha)
- Yeah, **I definitely liked the field trips**. (Rachel)
- I enjoyed getting to go out to do things in real life. (Jessica)
- **I knew what I was supposed to do, but I saw this huge library that had a lot of detail, and I didn't know where to start**. (Dorothy)
- I thought **the outside ones were kind of overwhelming, seeing a huge thing and trying to get that on a little piece of paper**. That kind of overwhelmed me. (Dorothy)

Skill Application: Design Sketches

All interview participants enjoyed the **creative design sketches** because of their clear purpose and because they liked to create something new.

- I think the design ones were the most helpful (...) because sometimes learning about the logistics (...) it's like, oh, what does this have to do with anything? But then **when we actually designed something and I was applying it, I think I really liked those.** (Samantha)
- Somebody's going to be like, "This is what I want," and then you have to come up with a bunch of different ideas, so I really liked those. (Rachel)
- I feel like **that's going to be what we're actually going to be doing.** (Rachel)
- That was probably my favorite assignments. I liked all those. (Dorothy)
- I felt like I was **actually creating something.** (Dorothy)
- (T)he design projects were kind of using them to **create something.** So I felt like that was a lot more challenging and **definitely helped me better understand some of the concepts.** (Maxwell)
- (...) **really nice and really fun because I got to come up with something,** not someone else's drawing. It was coming up with my own thoughts and really getting **one of the first time to design whatever I want.** (Joel)
- I think it's just the stretch the creative muscle. **You got to get to design what you want** with putting those practices into play. (Madison)

Praise of Step-by-step instructions

- Not surprising
- Requests for very linear instructions are very common
- Design process design is **not** linear in nature which makes many students uncomfortable

Request for more one-on-one private feedback

- Surprising
- Many students give the impression that they rather not talk to us
- It might be important to create a private environment for feedback

Impressive performance levels

- Compared to previous peer groups after the implementation of a constant feedback loop
- Students appeared confident but **not** comfortable during class

Travel sketches, popular mode but are currently perceived as a very complex task

- Fun alternative mode
- Need to work on bridging the gap between instructions and application
- More instructions on how to approach travel sketches

Design sketches, favorite assignment

- Important development
- Students will be better prepared for the design studios
- Suggests that we are making progress toward the goal to reincorporate free hand sketching as integral part of and tool during the design process

Thank you! Do you have questions?

What Remained to Be Explained?
Student-Feedback in a Sketching Course
